Take the following measurements, taking care to keep the tape measure straight:

1. chest circumference - place the tape measure around the widest point
2. waist circumference - place the measuring tape around the narrowest point
3. hip circumference - place the measuring tape around the widest part and make sure that the feet are close together

Take the following measurements, taking care to keep the tape measure straight:

4. inside leg length - measure from the crotch down to the floor
5. height - make sure you stand up straight and measure from the top of your head down to the floor
