

MEN'S

Cold WX T-Shirt AR Wool

MPN: X000005369

SIZE: XS, S, M, L, XL, XXL

WEIGHT: 180g / 6.3oz | (Size Large)

Constructed using No Melt / No Drip Nylon Core Spun Merino Wool, and patterned for maximum articulation and compatibility with accompanying PRO layers, the Cold WX T-Shirt AR manages conversion of perspiration to vapour by rapidly dispersing moisture throughout the fibres of the garment.

A minimal amount of the wearer's natural body heat is required to convert the perspiration to vapour, ideal when tasks transition from high exertion to sudden low exertion in cold climates. The accompanying PRO layers further maintain comfort while allowing the vapour to permeate to the outside air.

The combination of a high volume of natural Merino Wool with synthetic fibres increases durability and expedites drying time while also managing odour.

MATERIALS

- + NMND 180gsm Nylon Core Spun Merino Wool (81% Merino Wool)
- + Free from intentionally added PFAS

PRODUCT FEATURES

- + Advanced hybrid Merino Wool with Nylon core expedites wicking & vapour transfer
- + Patterned for maximum articulation and compatibility with accompanying PRO layers
