Our Products

Stock product

Stock products are kept in stock and sold through our retailers.

Made to order products

Made to order products are not kept in stock. They are produced when ordered. Contact us for the minimum order quantity (MOQ).

All these products are marked **MADE TO ORDER** in the catalogue.

Project Products

Project products are products that we have developed for various customers and which can be used as a basis for further development to suit the needs of a unit or company.

The minimum order quantity is depending on the product or system. Delivery time is approximately 4-8 months after the development has been completed and the product has been approved by the customer.

All these products are marked **PROJECT PRODUCT** in the catalogue.

Restricted

Some of our products are restricted and can only be sold to government agencies or similar. All these products are marked with **RESTRICTED** in the catalogue.

This is SNIGEL

SNIGEL is a leading Swedish company dedicated to improving the quality and functionality of personal equipment for law enforcement and military professionals.

Founded by Per-Henrik Magnusson a former airborne ranger, still serving as a reserve officer in the Swedish Armed Forces. He carried an ambition of being the best in the industry at producing user-centric products for the most demanding environments without compromising on quality.

With over 30 years of experience, our product development team includes experienced designers, engineers, and active-duty personnel, ensuring every product is built with firsthand operational expertise.

Our ability to rapidly develop customised solutions sets us apart, enabling us to meet your specific operational requirements.

SNIGEL
SWEDEN

Built to Last

We embrace modularity in our designs, allowing users to replace or upgrade parts to extend product life and further reduce waste. Our full range ensures that all equipment is designed to function cohesively as a complete system optimising compatibility and performance that work for tactical, medical, and civilian use.

We are committed to thoughtful material sourcing, ensuring that every product is made with materials that meet strict quality standards and align with environmental guidelines. This reflects our dedication to keeping our eco-footprint small, from raw materials to the final product.

Designed for the Demands of Duty

At SNIGEL, we specialise in three main product categories made for the rigorous demands of military and law enforcement professionals.

Carrying Systems

Includes modular backpacks, pouches, belts, and equipment vests designed for optimal weight distribution and quick access to essential gear. Each component integrates seamlessly, allowing users to customise their setup for different missions.

Protective Solutions

Our Protective Solutions provide maximum safety and comfort in the toughest conditions. Engineered for protection without unnecessary bulk, our ballistic vests and plate carriers work seamlessly with our carrying systems. Our products undergo rigorous testing by active military and law enforcement professionals, to ensure the end-user perspective.

Tactical Clothing

Designed for durability, comfort, and functionality in high-performance duty settings. Our range includes combat uniforms, base layers, and weather-resistant outerwear, all crafted with mobility and performance in mind. Each piece is field-tested by professionals to ensure it meets the demands of duty without compromise.

Custom Made

Many of our standard products can be customised to meet the specific requirements of our clients. From bespoke carrying systems to protective solutions, we work closely with clients to deliver the perfect fit for their operational requirements.

CATEGORY

Carrying Systems

Includes modular backpacks, pouches, belts, and equipment vests designed for optimal weight distribution and quick access to essential gear. Each component integrates seamlessly, allowing users to customise their setup for different missions.

A full-page photograph of a soldier in a forest. The soldier is wearing a black tactical suit, a large black backpack, and a helmet with camouflage leaves. They are holding a rifle. The background is a dense forest with trees and foliage. The text "Mission Backpacks" is overlaid in the center.

Mission Backpacks

30L Mission backpack -12

Traditional backpack with flap.

Zippered pocket in the flap.

Elastic shock cord on top of the flap.

The bag has a plastic sheet and an aluminum stay in the back to make it firm but adaptable.

Shoulder pads are made of plastic foam for comfort and even weight distribution. They have a chest strap and a handset/microphone attachment.

A ballistic plate or hydration bladder can be carried in the back compartment.

Roll-top open/close on main compartment keeps snow and debris out.

PALS webbing on the back of the pack to attach additional pouches.

One compression strap on each side.

Velcro for identification patch.

Microphone strap and elasticized microphone holder for section radio.

The pack can be attached to the back of our vests and plate carriers.

Roll-up ends on all straps to keep them taut.

Size: 30L. **Dimensions:** W=27, H=46 & D=16 cm.

Weight: 450 g

29-00394B56-000. Multi-cam

30L Waterproof mission backpack 1.0

A really light weight and waterproof backpack.

It only takes up 2L of space when packed.

It is completely waterproof with taped seams and a roll up closure in the top (not for diving).

Two flat 50 mm wide shoulder bands with a chest strap.

Roll up ends on all bands to keep them tight.

Size: 30L.

Dimensions: W=27, H=50 & D=18 cm.

Weight: 350 g

Article no. 29-01754A09-000. Grey

50L Mission backpack 3.0

Traditional backpack with flap.

Zippered pocket in the flap.

Elastic shock cord on top of the flap. The bag has an aluminum stay in the back to make it firm but adaptable. Shoulder pads have chest strap and handset/microphone attachment. Roll-top open/close in main compartment keeps snow and dirt out. Four PALS straps on the back of the pack to attach additional pouches. One compression strap on each side. Velcro closure for identification patch. Webbing and elastic for microphone for section radio.

The pack can be attached to the back of our vests and plate carriers. Roll-up ends on all straps to keep them taut.

The lid can be used as a separate backpack. Helmet holder.

Size: 50L. Dimensions: W=34, H=62 & D=22 cm.

Weight: 1500 g

Article no. 29-00160C09-000 Grey

Raincover with lark-loop made in three different sizes.

Article no. 26-02761A09-30

100L Backpack 2.0

Shaped to fit snugly along the back.

Rigid head hole and cut-out in the lid so you can tilt your head back when wearing a helmet.

The main compartment has a large inverted U-shaped zippered opening on the front so you can access most of the backpack.

The shoulder pads are made of plastic foam and 1 mm hard plastic for comfort and even weight distribution. They have a chest strap and attachment for handset/microphone.

2x12L removable side pockets with zippered opening that can be accessed when sitting on the backpack. Side pockets can also be worn as backpacks.

Top lid that can also be worn as a hip pack or small backpack.

The 8L top compartment is designed to carry a spare sweater, mines, a hydration system, your log book or similar.

The zippered 2L front lid compartment can hold flashlights, extra batteries, insect repellent, etc. Holder for a helmet, poncho or similar on top of the lid. Two zippered interior compartments are also located in the lid, one of which is accessible from inside the top compartment.

Bottom opening in the main compartment for a sleeping bag.

Waistbelt with plastic sheet and rigid foam with holes for ventilation.

The hip belt is centered so it can move freely with the body. Sled attachment point on hip belt.

Velcro patch for owner identification.

Roll-up ends on all straps.

Constructed of durable coated polyamide fabric and heavy-duty zippers.

Dimensions: W=36, H=84 & D=25 cm. Weight: 4600 g

Article no. 29-01161C09-100 Grey

100L Backpack system features

Rigid head hole and cutout in the lid allow you to tilt your head back when wearing a helmet.

Handle.

The lid is adjustable in height and can be used as a small backpack. Top straps.

Shoulder straps with plastic sheet and rigid foam with holes for ventilation. This is the best solution because the plastic sheet distributes the pressure on the foam.

Holder for group radio microphone.

Soft back padding in ventilated foam with mesh.

The inner back is a 2 mm rigid plastic plate with thick and sturdy aluminum stays to make the backpack stable even when packed with 50 kg.

Removable 12L side pockets with two zippers, one on each side, so they are accessible no matter how you set up the pack. Six outside attachment points for a duffel strap. Covered eyelets on the bottom. Stores rain gear, insulated jacket, ghillie jacket, personal stove, and 24-hour food supply.

Waistbelt with plastic sheet and rigid foam with holes for ventilation. The hip belt is centered so it moves freely with your body.

Side strap and sled attachment point.

Holder for a helmet, your poncho or similar.

8L top lid compartment with zipper for a spare sweater, mines, a hydration system, your logbook, etc.

3L zippered front lid compartment for flashlights, extra batteries, insect repellent, etc.

Velcro patch for owner identification.

Large removable lid that adjusts in height depending on how much you have in the main pack.

Two interior zippered compartments.

Back-up closure for all zippers on lid.

Elastic edge to keep dirt and snow out.

Side release buckles.

Webbing with PALS attachment points for additional pouches and bags.

Roll-up ends on all webbing.

Large inverted U zipper opening to access main compartment.

Inverted U-shaped opening for sleeping bag compartment.

Modular and Versatile 100L Backpack

All of these parts (except the butt pack) are included in the 60-120L backpacks.

One side pocket carried over one shoulder.

The lid carried as a backpack.

The lid carried as a butt-pack.

Two side pockets carried as a backpack.
The lid carried as a butt-pack.

Two side pockets carried as a backpack.

The pack of the big backpack.

The pack of the big backpack with the lid.

The pack of the big backpack with the lid and side pockets.

The pack of the big backpack with the lid and side pockets.
One 15-20L All pack attached to the back of the backpack.

The pack of the big backpack with lid and side pockets.
One butt-pack carried below the backpack.

The Piggyback System

This is our system of how to move from infiltration to combat in one smooth and fast way. The small backpack is attached on the back of the big backpack and easy to attach and to remove.

The small backpack is attached to the back of the large backpack.

The compression straps from the large backpack are connected to the compression buckles on the small backpack. Always keep this tight.

Disconnect the four side release buckles and the small backpack is free. Remove the small backpack.

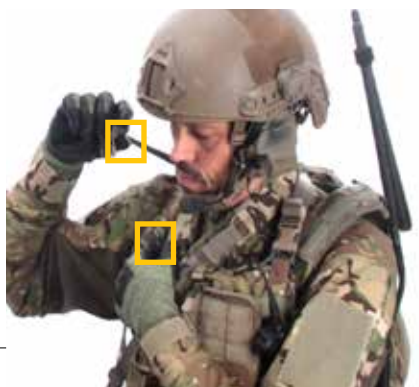

Connect the self access buckle to the buckle on one shoulder.

In this position you can also access the backpack, even when it is still attached to one shoulder.

Swing the backpack over your shoulder.

Connect the buckle from the self access strap to other side of the vest.

Grab the shoulder straps and close the side release buckles. This is now your waist belt. Tighten the belt.

The key to all this functionality is Snigel's versatile Herma-buckle. That makes all this possible.

120L Sniper backpack 1.0

Backpack with capability to carry our Dragbag close to the back.
Designed to match the natural shape of your spine.
Herma buckle to make it easier to use any buckle anywhere.
Large, removable lid that can be adjusted in height and used as a separate backpack. Large inverse U-shaped opening on the front.
Two large side pockets that are attached with zippers.
D-rings for snow-sledge. The backpack is detachable from the frame, for stand-alone use of the frame.
Two ports in the top for antenna, cables or hydration access.
Mounting for dragbag or weapon between frame and pack.

Dimensions: H=67 cm, W=38 cm D=34 cm. **Weight:** 4690 g

Article no. 29-02716
PROJECT PRODUCT

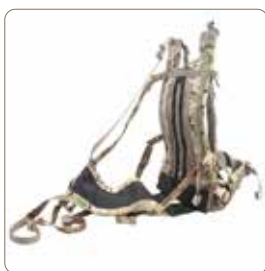

Packboard 2.0

Designed to match the natural shape of your spine.
Herma buckle to make it easier to use any buckle anywhere. Cut out in the back plate allowing bending the head back when wearing the backpack. Features include: Top tension straps, ventilated back cushion.
Shoulder straps with plastic sheet and firm foam for stability and comfort. This is the optimal solution with the plastic sheet distributing the pressure over the foam. Chest strap, back plate supported by High density PE and aluminium rods. PALS/MOLLE webbing on flap and the inside flap. Sturdy handle for lifting and dragging the pack board and four attachment straps.

Dimensions: H=66 cm, W=34 cm. **Weight:** 2600 g

Article no. 29-02065A **PROJECT PRODUCT**

120L Backpack system 1.0

A pack board, a large backpack, and a variety of carrying covers for specific equipment designed to work together in one system.

All based on our proven 120L backpack design.

Rigid head hole and cut out in the lid so you can tilt your head back when wearing a helmet.

Shoulder pads are made of plastic foam and 1mm hard plastic for comfort and even weight distribution. They have a chest strap and handset/microphone attachment.

Perforated webbing is used to attach the bag to the pack board. 2x15L removable zippered side pockets that can be accessed when sitting on the pack. Side pockets can also be used as separate packs.

Top lid that can also be worn as a hip pack or small backpack.

The 8L top compartment is designed to carry a spare sweater, mines, a hydration system, your log book or similar.

The zippered 2L front lid compartment can hold flashlights, extra batteries, insect repellent, etc. Holder for a helmet, poncho or similar on top of the lid. Two zippered interior compartments are also located in the lid, one of which is accessible from inside the top compartment.

Hole tape attachment for additional pouches and bags.

Bottom opening in main compartment for sleeping bag.

Waistbelt with plastic sheet and rigid foam with holes for ventilation.

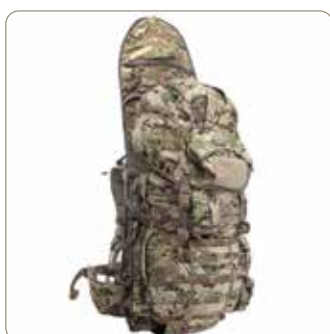

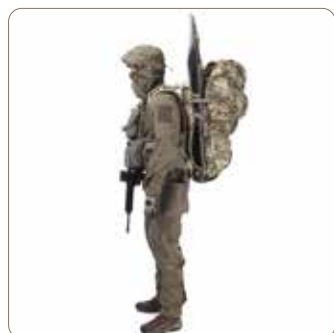

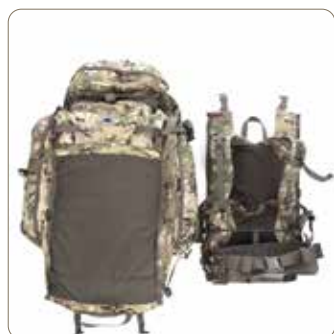

Hip belt is centered so it moves with the body. Velcro patch for owner identification.

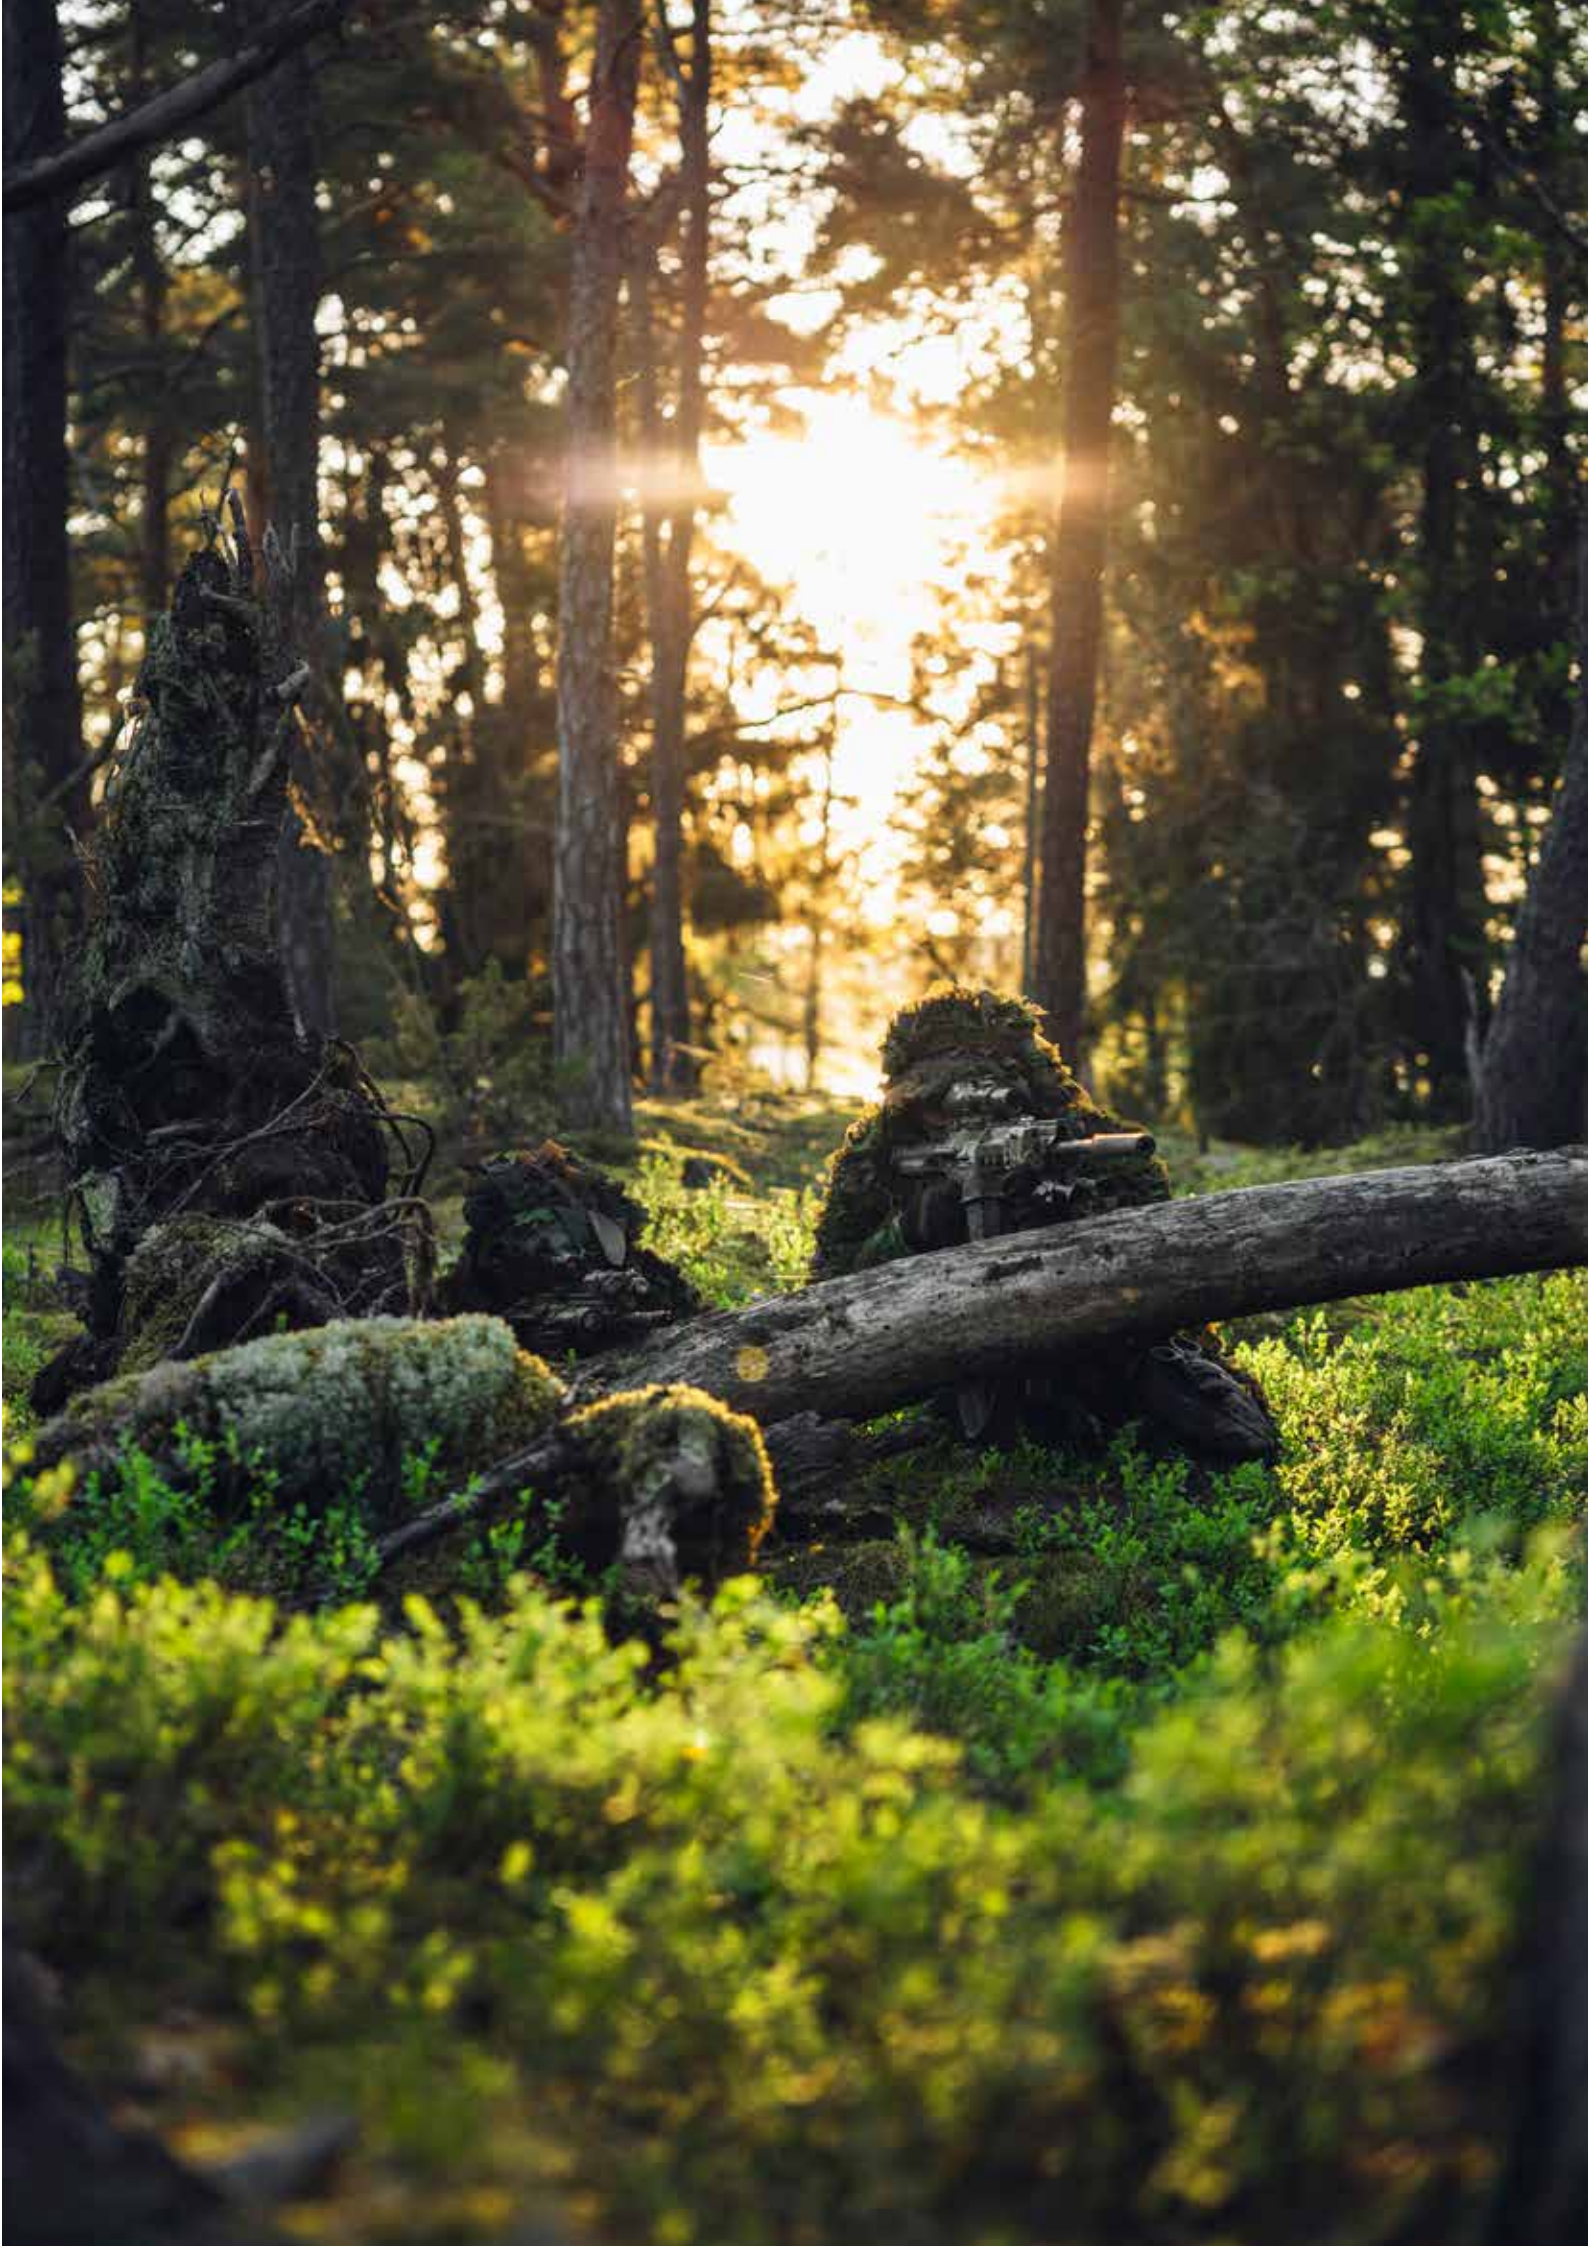

Roll-up ends on all straps.

Constructed of durable coated polyamide fabric and heavy-duty zippers.

Dimensions: W=36, H=84 & D=25 cm. Weight: 5300 g

Article no. 29-01409B **PROJECT PRODUCT**

Specialist Backpacks

30L Specialist backpack

A rugged, reliable and versatile backpack for storing and transporting sensitive/delicate equipment. The pack can be customized by the user for radio or medical equipment. It has a ventilated back with a plastic sheet and an aluminum stay to make it rigid but adaptable. Shoulder pads are made of plastic foam for comfort and even weight distribution. They have a chest strap and a handset/microphone attachment. The shoulder pads can be stowed behind the back plate, allowing the pack to be used as a shoulder bag, and one side compression strap can be used as a shoulder strap. A ballistic plate or hydration bladder can be stored in the back compartment. The pack is constructed of durable coated polyamide fabric with heavy duty zippers. Long, heavy-duty zippers with long pull cords allow the pack to open completely. Push button in the main compartment prevents the zipper from opening too much. Four long side compression straps sewn to the pack. The loose ends of the side compression straps are rolled up and secured with Velcro. The bag has two carrying handles, one on the side and one on the top. The main compartment has two inside zippered pockets that are good for first aid supplies, field equipment, or other technical gear. The outer pockets are zippered and each has an inner zippered elastic mesh pocket. PALS webbing for attaching pouches is located on the outside of the outer pockets. An optional medical divider can be attached with straps to the center of the inside of the pack. The divider remains vertical when the pack is opened. A manpack radio can be secured with two straps close to the back for best weight distribution and balance (straps not included). Two holes for cables or a hydration system tube are located in the top of the pack. Access holes for radio or computer cables are located on each side of the bottom of the pack. The cable for the radio microphone goes through the access hole in the bottom of the pack, then the microphone is attached to the shoulder pad. Owner identification can be written on the Velcro strip. The backpack fits the dimensions of carry-on luggage. The backpack can be attached to the back/top of our vests and plate carriers.

Size: 30 liter. Dimensions: W=32, H=48 & D=18 cm.

Weight: 1500 g

MADE TO ORDER

A photograph of two soldiers in full combat gear, including helmets and tactical vests, standing on the deck of a boat. They are looking out over a body of water towards a sunset. The sky is a mix of orange, yellow, and blue. The water is calm with some ripples. The soldiers are wearing dark, tactical gear. One soldier is pointing towards the horizon. The overall mood is serious and focused.

Combat Backpacks

15L Princess backpack

A small basic backpack for a short time mission.

It has a removable plastic sheet in the back to make it firm, but adaptable. Shoulder pads are made from plastic foam for comfort and even balance of weight. They have a chest strap.

MOLLE Velcro panel set 1.0

Article no. 27-02752A20-000 Grey

A soldier in full combat gear, including a helmet and camouflage uniform, is crouched in a field of dry grass and brush, looking through binoculars. In the foreground, an open, dark-colored equipment case with a woven texture is lying on the ground. The case is filled with various electronic components, including cables with orange connectors and a small black device. A person's arm, wearing a grey glove, is visible on the right side of the frame, reaching towards the case. The background is a dense, out-of-focus field of dry vegetation under warm, golden light.

Protective Series

Drone pilot hand warmer 1.0

Light weight, warm and waterproof hand warmer.

Allows the pilot to keep their hands warm & dry whilst flying the drone using the small controller.

With the zipper opening you can adapt to different sizes of monitors (8-14 inch).

Fits a 0,5L water bottle with warm water to add extra heat in extreme cold weather.

Weight: 40 g

Article no. 02-02249A09-000

PROJECT PRODUCT

Medium protective pouch

A lightweight protection pouch with a wide opening top zipper.

The pouch is reinforced with a 1 mm plastic sheet and 5 mm foam.

It opens on 3 sides for an easy access to the contents of the pouch.

The zipper is semi stiffened to be easier to open and close.

Fold back attachment system makes it possible to attach the pouch on any equipment vest or belt.

MOLLE webbings on the front.

Dimensions: H= 18, W=19 & D=8. **Weight:** 150 g

Article no. 22-00511-09-000. Grey.

Slings

Weapon Sling System 1.0

A very comfortable, flexible, fast, accessible and safe way to carry a weapon.

With a vest strap attached to the vest, the weapon can be carried attached to the vest. This eliminates the uncomfortable neck strain associated with traditional gun slings.

The sling is adjustable at both ends.

The system includes two vest straps that can be attached to either shoulder. The weapon can then be carried centered or over the shoulder, right or left.

The Weapon Sling System allows several different ways to carry a weapon:

1. As a standard rifle sling, with the shoulder pad and two attachment straps attached to the front and back of the weapon.
2. With a vest strap on the right or left shoulder on the vest. One attachment strap mounted in the rear of the weapon and then attached to the vest strap.
3. With one vest strap on the right and left shoulder of the vest. Both attachment straps are mounted in the back of the gun and then attached to the vest straps. The weapon is now centered on the chest.
4. Attachment straps are attached to the shoulder pad and then both are attached to the rear part of the weapon; now the weapon hangs in a loop around the neck. The rifle can be folded up and the elastic cord can be pulled around the barrel or other part of the rifle to secure it when skiing or shooting with a section rifle. Be careful if the barrel is hot, it may melt the elastic cord.

The system can be mounted in two different ways:

- A. Silently, inside the gun with the sewn loops.
- B. Flexible with snap hooks.

Protective Solutions

Our Protective Solutions provide maximum safety and comfort in the toughest conditions. Engineered for protection without unnecessary bulk, our ballistic vests and plate carriers work seamlessly with our carrying systems. Our products undergo rigorous testing by active military and law enforcement professionals, to ensure the end-user perspective.

Ballistic Vests

We provide both soft and hard ballistics. Every individual demand is unique and so is the most optimal solution. Therefore we have partnership with hand-selected ballistic providers with different qualities and capabilities. We have ability to supply protection against all threat levels and according to all available ballistic performance standards e.g VPAM, NIJ, HOSDB. We can tailor the solution for you by offering multiple options, without being tied to a certain manufacturer. Lastly we provide patterns to integrate the ballistic protection into our cover.

The Squeeze System

Adaptable to many missions and environments

The Squeeze Ballistic Protection and Equipment Carrying System allows you to tailor protection and carrying capacity to your needs, while taking into account weight, heat stress and other challenges.

Full system components:

- Ballistic yoke with collar
- Small ballistic sleeve set
- Squeeze side panel pouch with a ballistic panel
- Squeeze buckle closure
- Squeeze ballistic vest with ballistic panels.
- Squeeze buckle closure
- Combat belt with a ballistic panel
- Ballistic groin protection

Common system components:

- Squeeze side panel pouch with a ballistic panel
- Squeeze buckle closure
- Squeeze ballistic vest with ballistic panels.
- Squeeze buckle closure

Parts in the Squeeze System

A combination of different parts

Depending on the threat, the mission and the environment, the parts can be combined in different ways.

Squeeze Features

Removable shoulder pads with cable channels.

Velcro flaps protect your earphones when not in use.

Internal Velcro loop for attaching to ballistic yoke.

PALS webbing on front and back.
Velcro allows you to attach unit and individual patches.

Pockets for up to 26.5x34 cm hard plates in the vests and 25x32 cm in the plate carrier. The pockets also hold ballistic panels.

An attachment point for a repair buckle is located under the top PALS straps on the front. Our chest rig can be attached to the buckles.

An elastic cord runs along the edge.
Cables and the hydration tube can be secured under this cord.

A zip or Velcro can be attached to each side.
There are two different ways to close and tighten the pack: Quick adjust or Side Panel Pockets.

The side panel pouches have an elasticated band at the back for a flexible, snug fit.

The length is adjusted with the shoulder straps and the width with the side closure system.

The interior is clean to make it as comfortable as possible and to prevent it from catching on your uniform when you put it on or take it off.
Soft ribs are stitched to the inside for comfort and ventilation.

Fabric, not mesh, is used under the panels to protect the ballistic panels.

Back pocket for buckle system.

PALS webbing on the back.

The Squeeze panel carrier is used when a low profile is required.

The Squeeze ballistic vest fits users, male or female, from 160 cm to 190 cm in height.

The long ballistic vest fits taller users.

Accessories Features

Buckle closure, fast, safe and easy to open and close.

Side panel pouch with or without NIJIIIA panel.
Available in three lengths with 7, 9 or 11 PALS slots.

The Light combat Belt is fitted with a Spoon Garage
on the back.

PALS front panel closure with the flap open and the
Velcro patches exposed.

Side panel pouch with or without NIJIIIA panel.
Available in three lengths with 7, 9 or 11 PALS slots.

Extra Protection Features

Ballistic yoke with collar and neck guard.
The throat guard is removable.
Easy to put on and take off.

Ballistic sleeves to protect the upper arms and armpit.
The sleeves are attached to the ballistic yoke or directly to the Squeeze. They move freely and do not restrict your arm movement.

Side panels to protect your sides and hold the Squeeze together.
A ballistic hard plate can be carried in the side panel pockets.

Crotch ballistic protection is attached to the front of the Squeeze.
It is shaped to protect without restricting leg movement.
It can be worn hanging free or attached with Velcro between your legs.

A combat belt with a ballistic panel.

The back crotch guard is attached to the combat belt.
It can also be attached to the Squeeze.

Squeeze Ballistic vest 1.3

The vest that fits most users between 160 and 185 cm. Combine it with the side panel pouches to get a complete vest or the Squeeze Quick adjust to get a cool vest.

Front height 34 x width 40 cm.
Back height 41 x width 34 cm.
The front area is 1100 cm².
The back area is 1100 cm².

Flight uniform and protection system

1.0 RESTRICTED

This is a fully integrated uniform, plate carrier, pouches and life preserver system designed and developed on contract with the Swedish Air Force over 4 years.

PROJECT PRODUCTS

A full-page background image showing three soldiers in tactical camouflage uniforms and helmets, walking in a line on a gravel path. The soldier in the foreground is in sharp focus, holding an assault rifle. Two other soldiers are visible in the background, slightly out of focus. The scene is set in an urban or industrial environment with a building in the background.

CATEGORY

Tactical Clothing

Designed for durability, comfort, and functionality in high-performance duty settings. Our range includes combat uniforms, base layers, and weather-resistant outerwear, all crafted with mobility and performance in mind. Each piece is field-tested by professionals to ensure it meets the demands of duty without compromise.

Combat System

Combat trousers 1.1

Combat trousers with excellent comfort, durability and freedom of movement.

Elasticated waist. Brace holder on each side. The fly zip goes all the way down to make it easy to adjust inner layers, tuck in a shirt, ventilate or pee.

Two side pockets. and two large zipped thigh pockets with inside compartments.

Pre-bent knees for increased mobility.

Knee pockets for padding designed to stay in place when kneeling.

Shin pockets on lower legs for e.g. first aid kit and leg protectors.

Long outer leg zips for ventilation.

Velcro adjustment on lower legs and elasticated drawcord with shoestring hook at bottom of trousers.

Available in a range of fabrics and colours, including flame retardant (FR).

Weight: 975 g

Article no. 06-01866A

Combat shirt 1.1

A close-fitting combat shirt with a wool-blend jersey body and stretch fabric sleeves for excellent comfort and freedom of movement. Zipped collar for heat regulation. Elbow pad pockets and zipped sleeve pockets with Velcro closure. Pencil pocket under left sleeve. Outside neck hanger. Velcro adjustable cuffs.

The shirt is available in various fabrics and colours, as well as flame retardant (FR).

Weight: 485 g

Article no. 04-01812A

Combat jacket 1.1

A jacket designed for freedom of movement with adjustable ventilation to keep you comfortable in different climates. Made from stretch fabric to be flexible and quiet. Front zip. Removable hood, large enough to cover a helmet, with Velcro closure and three adjustment cords to suit all needs. Elbow pockets and sleeve pockets with zip and Velcro closure. Pen pocket on lower left sleeve. Back pocket. Rank holder. Hanger on outside of neck. Velcro adjustable cuffs.

Ventilation zips in arm pits.

Elasticated draw cord at waist and bottom.

Mesh lining to keep you as cool as possible. Double layer of fabric on the bottom of each pocket for extra strength.

The jacket is available in a variety of fabrics and colours, as well as FR (flame retardant).

Weight: 1150 g

Article no. 07-01768A

Fleece jacket 1.0

A lightweight and fluffy fleece jacket, a real favourite!

Zip front.

Zippered side pockets.

Ventilation zips at the arm pits to match the combat and shell jacket

ventilation zips.

Elasticated cuffs.

Utility trousers 1.0

These utility trousers are designed for use in the barracks or during your free time.

Spacious Zippered Thigh Pockets: These trousers have two large thigh pockets with zippers. They offer ample room to store a large mobile device securely.

Protective Side Pockets: There are two big side pockets that come with fall-out protection. This feature prevents your keys or other small items from falling out, even when you sit down.

Stretch Material for Comfort and Flexibility: The trousers are made from a stretchy material. This ensures that your movements are never restricted, allowing you to move freely. Moreover, the stretch fabric ensures a comfortable fit, so you can wear them with ease.

Sizes: 46-54 short length, 46-58 regular length & 48-56 long length.

Weight: 680 g

Article no. 06-01572A09 Grey. 06-01572A01 Black

Knee pads 2.0

12 mm flexible, ergonomic polyethylene knee pads.
The pair of knee pads are placed in pockets on the inside of the trousers, with the ribbed side facing inwards to protect the knees.
The text "This side towards the enemy" is placed on the outside of the trousers. Holes are punched in the knee pads to increase ventilation, making them cooler in hot weather. The lower part of the pads can be cut off to adjust the height so that they rest on the knee when kneeling.
The knee pad can be used in the combat trousers.

Sizes: One size. Weight: 40 g

Article no.00-01669A01-000 Black

Elbow pads 2.0

12 mm flexible, ergonomic polyethylene elbow pads.
Pairs of elbow pads are placed in pockets on the outside of the combat shirt or jacket, with the ribbed side facing inwards to protect the elbows.
The text "This side towards the enemy" should be placed on the outside of the garment. Holes are punched in the knee pads to increase ventilation, making them cooler in hot weather. The lower part of the pads can be cut off to adjust the height so that they rest on the elbows. The knee pad can be used with many of our jackets and combat shirts.

Sizes: One size. Weight: 30 g

Article no. 00-01670A01-000 Black

FR AnnaClava 1.0

An evolution of the classic balaclava, with a strong mesh over the mouth and nostrils to allow free breathing – even during strenuous tasks – while still providing protection.
Lightweight and thin enough to be worn under a helmet for protection from wind and cold, yet airy enough to be worn in hot weather.
The annaclava is cut long to cover the entire neck.
Flatlock seams for added strength and comfort.
Can be used as a beanie by tucking the excess material into the cap.

Sizes: One size. Weight: 60 g

Article no. 09-00409A09 Grey

FR Neck gaiter -17

A close-fitting FR neck gaiter that can be used to protect your neck, as a dust cover for your mouth or as a beanie.
Lightweight and thin to be comfortable in most situations.

Sizes: One size. Weight: 40 g

Article no. 09-01353-09 Grey

FR Beanie -17

A close fitting FR beanie that can be worn under a helmet.
Lightweight and thin to be comfortable in most situations.

Sizes: One size. Weight: 40 g

Article no. 09-01352-09 Grey

A man with a beard is shown in profile, wearing a dark, hooded tactical jacket that is covered in water droplets. He is carrying a large, dark backpack. The background is a blurred forest with green foliage. The text "Shell Clothing" is overlaid in the center of the image.

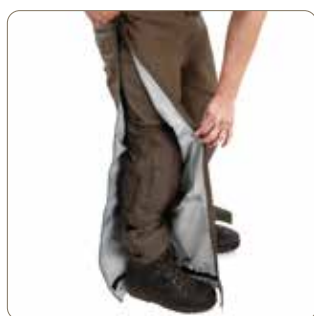

Shell Clothing

Shell trousers 1.0

Trousers in waterproof/breathable stretch fabric for excellent comfort and freedom of movement. Elasticated waist with belt loops and braces. Long zip fly. Long outer leg zips for ventilation and access to the trousers underneath. Velcro adjustment on lower legs. Elastic and press stud adjustable leg ends.

Weight: 615 g

Article no. 06-01835B

Shell jacket 1.0

A shell jacket in a waterproof/breathable stretch fabric that combines excellent comfort with outstanding freedom of movement. Front zip with double flaps with press studs. Hood with elasticated drawcord adjustment. Elbow pockets and sleeve pockets with zip and Velcro closure. Zipped chest and back pockets. Rank holder. Hanger on the outside of the neck. Velcro adjustable cuffs.

Weight: 945 g

Article no. 07-01834B

Thermal Clothing

Light thermal jacket 1.0

This jacket features a zipped front, a fleece-lined collar, and ventilation zippers in the armpits. It also includes zipped side pockets, breast pockets with zippers, and a hanger on the outside of the neck. The cuffs are adjustable with Velcro for a comfortable fit.

Weight: 605 g

Article no. 07-02150A

Thermal jacket 1.0

A thermal jacket in waterproof/breathable fabric combined with insulation to provide a warm and lightweight jacket. Front zip. Hood with elasticated drawcord. Zipped sleeve pockets with touch and close fastening. Zipped side pockets with zipper pull in the closed position. Zipped breast pockets. Rank holder. Hanger on the outside of the neck. Elasticated cuffs. White inside that can be turned out for use in snow.

Weight: 905 g

Article no. 07-01929A

Thermal trousers 1.0

Over-trousers designed to be worn over other trousers. Elasticated waist with belt loops and loops for braces. Long zip fly. Long outer leg zips for ventilation and access to the trousers underneath. Lower legs can be tightened with buttons. Elasticated and button-fastened leg ends. White inner leg, which can be turned outwards for use in snow.

Weight: 685 g

Article no. 06-01989A

Braces 2.0

The design is inspired by old US Army braces from the 1950s. The braces are attached to the side of the trousers by threading the Velcro ends around the belt or through straps on the trousers or using the supplied hooks to attach it in the belt loops. When you need to answer nature's call, simply release the side braces and pull your trousers down, leaving the braces on over your shoulders. This is handy if you are wearing a vest or padded jacket. One size fits all.

Weight: 90 g

Article no. 10-00215B09-000 Grey.

Size System

We've created a size system that is user-friendly and easy to understand for both the logistic and individual users. Our main objective is to help users find clothing that fits them perfectly. Here's how our system works:

Familiarity: Our size system is based on the familiar concept of length and width, similar to how jeans are sized. This familiarity makes it easier for users to understand and select the right fit.

Flexibility: Our system accommodates different size ranges within the same framework. For example, elastic underwear offers more flexibility than outer layer trousers, but they all fit logically into the same system. We can also expand or contract the size system while maintaining its logical structure if needed.

Width and Length: Our trousers come in 14 widths, represented by letters from F to S. Each size increment corresponds to a 4 cm difference in width. We offer five different lengths, ranging from 2 to 6, with 6 being the longest length. Each length increment corresponds to a 6 cm difference in length. Shirts, Jackets, and Over Trousers are available in eight widths, represented by double letters such as EF-ST. Each width increment corresponds to an 8 cm difference. Similarly, we offer five lengths ranging from 2 to 6, just like the trousers. We also include the NATO size in our range.

What is presented below is the full size range that can be used for projects. All garments that we keep in stock have a limited size range.

3L Multi-purpose bag -15

Small enough to carry with you at all times, and large enough to carry the initial medical needs of the section or small team. Can be worn on the vest or on the leg with the belt and leg straps. The openings are designed to be easy to reach and work with. Outside zippered compartment for the first needs, including scissors. Many internal elastic pockets to keep the contents in order. Fold back attachment system allows the bag to be attached to any equipment vest or belt. Outside PALS webbing. Outside Velcro strips so you can apply your markings. Designed for carrying medical or technical equipment.

Dimensions: H=25, W=21 & D=8 cm. Weight: 470 g

Article no. 28-00100-01-000 Black, 28-00100-09-000 Grey

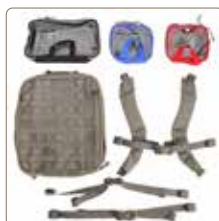

10L Multi-purpose bag -15

For the group medic, technician, etc. who wants to carry the necessary equipment on the vest, around the waist, on the back, over the shoulder or attached to the backpack. Large compartment with Velcro flap inside the bag. Four small clear plastic zippered compartments inside the main compartment. Four elastic pockets with Velcro closure on top of the main compartment. One large and two small inner pockets in different colors attached to the bottom of the bag with Velcro. Zipper closure with emergency buckle on top. Two padded yoke straps with sternum strap to be used when carrying the bag as a backpack. Two long straps that can be attached to the back of a tactical vest or linked together for use as a shoulder strap. Roll-up ends with Velcro closure to keep straps tidy. Two short straps to attach to the vest or around the leg. Handle on top to carry the bag in your hand. Outside Velcro strips so you can attach your markings.

Dimensions: H=33, W=30 & D=10 cm. Weight: 1100 g

Article no. 28-00271-09-000 Grey

Feather weight stretcher -09

An extremely lightweight stretcher that can be attached to the medical bag. The advantage of this stretcher is that you actually carry it with you. It fits in a magazine bag or similar (10 x 10 x 5 cm). Perfect for carrying in our Trauma Pouch. Strong enough to carry a fully loaded soldier (150 kg). Can be used as a sled (the fabric may tear, but the patient will stay on it). Six handles. Two channels for poles.

Dimensions: 188x61 cm. Weight: 200 g

Article no. 54-00540-09-000 Grey

120L Multipurpose backpack 1.0

A multi-purpose backpack. For the advanced radio operator or the surgeon who needs to carry a lot of equipment in the field. The front can be fully opened with 2 zippers to expose the entire interior. One large flap with one large and one small outside pocket. Seven large outside zippered pockets with inner elastic bands and one large zippered pocket. Two full height zippered side pockets. Six removable interior pouches that attach to the Velcro covered interior. One large rigid inner pocket that folds out like a table. Surgical instrument roll with Velcro closure. One removable pouch that attaches to the bottom

Dimensions: W=36, H=80 & D=25 cm. Weight: 5200 g

Article no. 29-00246 **PROJECT PRODUCT**

70x120 cm Velcro panel 1.0

A big wall covered with Velcro loopfabric, where our insert pouches with Velcro hook back can be attached. Hangers in the top so you can hang it anywhere. Compression straps around the panel to keep it tight when stored. Removable shoulder pads makes it possible to carry the panel as a backpack. Zipped window compartment on the middle for information storage. Will hold 12x Large insert pouches or more medium or small insert pouches.

Dimensions: W=70, H=120 & D=25 cm. Weight: 1500 g

Article no. 27-02537A **MADE TO ORDER**

Large insert pouch 1.0

One zippered pouch, designed to fit seamlessly into a variety of bags, including the Specialist backpacks, Roller bag, Organized bag, and duffel bags. The pouches feature hook Velcro on the back, enabling easy attachment to the Velcro panel inside the bag or backpack. Outside Velcro patch and window for attaching content indication. Inside is covered with Velcro loop fabric so you can attach our elastic insert stripes to keep good order on the content of the pouch. 12 of the insert pouch fits on the 70x120 cm panel.

Dimension: 16x34x9 cm. Weight: 75 g

Article no. 27-025538A20-000 Beige

A soldier in a white winter uniform and helmet is shown in profile, looking down at a handheld electronic device. The device has a screen displaying a map and a physical keypad. The soldier is wearing a large black communication device on their helmet. The background is a snowy, wooded area with bare trees. The overall color palette is cool, with blues and whites.

Miscellaneous Products

Small notebook cover 2.0

A protective cover for your notebook, with a writing pad so you can take notes in the rain. Two pen pockets on the inside.

Fits A7 notebooks hanging on the top or side.

The cover is made of plastic that withstands moisture and is durable.

It is closed with an elastic band that lasts longer than Velcro and is quiet to use. There is a tablet on the outside and inside that you can write on with a pencil. Here you can write the information you need close at hand. Wipe it clean with a wet finger when you don't need the information anymore or want to write something else.

On the back is a small window pocket for a memory card or a small map.

The folder has two loops for attaching a cord. With the cord attached, you can wear it around your neck.

Size: A7. Dimensions: H= 14, W=11 & D=1 cm. Weight: 80 g

Article no. 52-00140B01-000 Black, 52-00140B09-000 Grey

A5 Field binder -07

An administrative case that protects your documents and maps from water and dirt.

This field binder is the current result of ten years of continuous development.

The administrative case has a large outside pocket for reserve forms etc.

On the outside of the case you will find a window pocket for maps, on the other side you will find a pocket for pens, an eraser and on the short side you will find a pocket for a short ruler.

On the inside is a removable black ring mechanism for A5 papers. The inside also has two window pockets for memory cards, maps, etc. and elastic cord loops to secure pens and the compass.

On the inside, a protective flap can hold a light stick so you can read your documents without revealing your location. A zipper runs around the outside of the case, and as a backup, two elastic bands can be used instead of the zipper.

Size A5:. Dimensions: H=27, W=23 & D=6 cm

Weight: 390 g

Article no. 52-00506-01-000 Black, 52-00506-09-000 Grey

Memo board -14

The Tactical Wrist Trainer is used to keep small maps, sketches, notes, photos or other similar administrative items within easy reach. It is designed to fit around the forearm for easy access to the three clear view windows. On top of the clear windows is a rigid plastic writing pad for rainproof writing. Rub the board with your finger when you want to write new notes with your pencil. The memo board is attached to your forearm with 2 elastic straps. The window/board section can be removed from the wrist strap and attached directly to our jackets.

Perfect for making a one or two man shelter or as a cover for an observation post.

Dimensions: 2 x 3 m. **Weight:** 840 g

Article no. 51-02472A09-000

PROJECT PRODUCT

Law Enforcement Equipment

Law Enforcement System

The system

This is a uniformed carrying system based on our equipment belt and the various pouches attached to it. It has been designed with safety, functionality and comfort in mind.

Comfort

Our belt is one of the most comfortable equipment belts available. It is padded and shaped to fit comfortably around the body, even when fully loaded.

Pouches are mounted between the inner and outer harness so there are no edges or hard surfaces to rub against. The padded inner harness has friction fabric facing inwards towards the body. This non-slip material helps to keep the harness in place, reducing the need to tighten the harness around the waist.

Availability

The pouches are designed to be easily accessible and can be attached at different levels, some pouches can be attached vertically or horizontally.

The pouches can be attached without removing the pouches already attached to the belt.

Safety features

The harness has a three-point buckle to prevent accidental opening and a safety strap that fastens over the outer buckle.

The pouches are fitted between the inner and outer belt, making them virtually impossible to remove. The belt is extremely difficult to ignite.

FR Tactical coverall 1.0 **RESTRICTED**

A fire-retardant FR stretch coverall designed for operators wearing a ballistic vest or plate carrier.

Stretch body for ease of movement and ventilation.

Hood in collar.

Ventilation zippers in the arm pits.

Two large sleeve pockets with outside pockets and Velcro for patch attachment.

Leg pockets are on the front of the leg so they do not move when you run. They are made with a tunnel underneath so you can put your pistol behind them and pull the straps underneath the pocket.

Full-length leg zippers for ventilation and to make it easier to put on the coveralls when wearing boots.

Articulated elbows and knees with pockets for padding.

Shin pockets for first aid kit and shin guard.

Shoe attachment system in the leg end for a dirt-proof connection between your boots and coverall.

Sizes: XS-XXL/short, XS-XXL/regular, XS-XXL/long.

Weight: 1700 g

Comfort belt –13

A padded belt with two to three PALS webbings sewn on the outside for a comfortable carry of any type of pouch or holster.

The PALS webbings are sewn on eight cm wide panels with slots between the panels. The inner belt can be placed on the outside of one or more panels so a pistol holster can be worn. An inside 25 mm band is sewn under the panels, use it to attach a leg panel if you need to. It prevents the band from the leg panel from blocking other pouches on the belt itself. A ballistic panel can be inserted inside the belt.

Remove the waist band and use the riggers belt to combine the features of both belts.

A three point security buckle prevents unwanted opening. The adjuster makes it easy to adjust the size of the equipment belt when you change from heavy winter clothing to lighter clothing. The security band is used as usual on top of the adjuster. This adjuster is very neat when you are changing your clothing during the day. In the morning, it is cold and you wear more clothing. When it gets warmer and you remove some clothes, you need to tighten the belt, and then you use the Belt adjuster.

General Purpose pouches

The pouches are designed to be lightweight and take as little space as possible, while remaining strong enough for military use.

Elastic band, on the pouch to keep the contents secured, even when the flap is open. Pull tab on the flap to make it easy to open, even with gloves on.

Velcro closed flap with pull tab, for easy opening The flap can be pushed into the pouch for easier access to the item you carry in the pouch. The top is stiffened to make it easier to holster.

Bottom drain hole. Fold back attachment system makes it possible to attach the pouch on any equipment vest or belt. It has Velcro bands on the back so that it can be carried horizontally on the trousers belt. To carry it vertically you use the silent and easy to use fold back system on the back of the pouch. This system makes it possible to attach the pouch without removing other pouches from the belt.

A man in tactical gear, including a black jacket and a vest, is shown from the side. He is holding a rifle across his chest and a handgun in a holster on his hip. The background is a brick wall. The text "Covert Equipment" is overlaid on the image.

Covert Equipment

Covert Equipment

The System

Like all our systems, this one is comfortable, secure and provides easy access to your gear. It has also been designed with concealment as an essential element. The system is based on our equipment vest with specially designed and stitched pockets and compartments. The vest is available in two different versions, specifically tailored for each task – Surveillance and Tactical. We also have pouches that can be attached to a trouser belt.

Comfort

The vests are well tailored, distributing pressure evenly over the shoulders and around the body. They are very light, durable and easy to size. One of the biggest advantages is that you know you have all your equipment in one place, the vest. When you are off duty, you can remove the vest with the confidence that all your equipment will remain in place.

Availability

The pistol can be carried as usual in the trouser belt. The vest is cut so as not to obstruct access to the weapon. Two compartments for the pistol are sewn on the inside of the vest for left or right-handed shooters. The pockets on the vest are designed and positioned so that what you need most is quickly and easily accessible.

Pouches and belts

We have holders, pouches and belts specially designed for concealed carrying of police equipment. We have two types of harness to carry radios, batons, handcuffs and CS spray in comfort and safety.

Surveillance Vest

This vest has compartments for the equipment needed during surveillance.

Tactical Vest

This is the vest for users who carry heavier weapons with extra magazines etc.

Elastic pouch 1.0

Low profile, safe and versatile elastic pouches for all kinds of equipment that is to be carried on a trouser belt or tightly fit on an equipment vest. Choose between 5,56 or 7,62 size.

Two outside compartments for pistol or SMG magazines, OC spray or any other smaller gear.

A full width interior compartment for a radio, 7,62/5,56 mm magazine or similar.

The pouch is made in an elastic fabric to stay as flat as possible and keep the content rattle free and secure.

5,56 Dimensions: 10 x 15 x 1 cm

Article no. 21-01701A01-556 Black, 21-01701A09-556 Grey

7,62 Dimensions: 10 x 15 x 2 cm.

Article no. 21-01701A01-762 Black, 21-01701A09-762 Grey

Crotch pistol holster 2.0 **RESTRICTED**

If you really want to carry your small pistol concealed, this is a good option.

Works for right or left handers.

Fits a small pistol.

Padded with 3D spacer liner to be as comfortable as possible.

Wear it under your pants.

Elastic waistband with Velcro closure.

Holder for extra magazine.

Dimensions: H= 30, W=40 & D=2 cm. Weight: 50 g

Article no. 35-00605B01-000 Black.

Covert elastic equipment belt 2.0 **RESTRICTED**

A very light and snug belt with integrated pockets for concealing gear.

Two layers of elastic keep your gear secure and close to your body.

Stores communications equipment, baton, tear gas spray, flashlight and other items required for surveillance and security operations in 12 pockets. Velcro closures at the bottom of each compartment.

Velcro closed front.

Adjustable elastic cord at back.

One size fits all. Weight: 280 g

Article no. 12-01757A01-000 Black

Single side covert equipment harness –11 **RESTRICTED**

A light-weight and tight harness for minimal covert equipment carrying.

For one radio, one CS spray can and a telescopic baton. A pair of handcuffs can be carried under the arm on the other side of the panel. On the shoulder strap a microphone can be attached.

Dimensions: H= 26 & W=9. **Weight:** 300 g

Article no. 15-00602-01-000. **Black**

Dual side covert equipment harness –11 **RESTRICTED**

A light and snug harness for minimal concealment.

Covert carrying with open or closed jacket.

Carries a radio, CS spray can, handcuffs and a telescopic baton.

The harness is small and thin and is worn out of sight with an open jacket or shirt.

The harness is comfortable despite the narrow shoulder straps.

The straps relieve pressure on the neck.

The harness can be worn with the pockets facing outwards or inwards.

You can carry all your equipment in the harness instead of in your trouser or jacket pockets. All your gear is in one place and easily accessible.

The harness is easy to put on and take off.

Belt straps prevent the harness from sliding forward.

A microphone can be attached to the shoulder strap. Cables can be threaded through the elastic loops supplied with the harness.

Dimensions: H= 14 & W=14. **Weight:** 320 g

Article no. 15-00492-01-000. **Black**

Covert equipment stretch vest –16 **RESTRICTED**

Transformer covert backpack -12

RESTRICTED

The covert backpack is called the Transformer for a reason. In less than 30 seconds (less than 10 if you have practised), the backpack is transformed into a tactical ballistic vest with your weapon strapped to your chest.

The bag has three main functions:
Reconnaissance, tactical or personal protection.

For the *undercover officer*, the bag will hold your radio induction loop and headset. It can also hold your handgun and baton where they are easy to reach. There is also space for a ballistic vest and backup weapon to be carried discreetly when only a thin shirt or T-shirt can be worn.

For the *tactical officer*, the bag provides the ability to transform a civilian-looking person into an assault-ready operator in about ten seconds.

The bag contains the ballistic vest and ceramic plates, magazine, diversion grenades, radio with headset, police badge, etc. The G36 or MP5 is attached to the inside of the bag and can be easily removed when the vest is deployed.

The *personal protection officer* can be covert and still carry protective equipment and backup weapons, increasing the chances of handling a critical situation flexibly and quickly.

Holds your personal body armour and two hard plates. Internal Velcro covered PALS webbing for pouches for communication equipment, magazines, tear gas spray, flashlight etc. for surveillance and tactical operations.

A special Velcro pistol holster is included.

Cable ports and channels for hidden microphone and earpiece.

Hidden rear compartment with zip opening for pistol and baton.

The maximum length of a folded weapon carried in the backpack is 50 cm.

Dimensions: H=52, W=35 & D=14 cm

Weight: 2200 g

Article no. 29-00155-01-000. Black

38 mm Covert equipment belt -17
