 NightSearcher

2026

Lighting the Future, Powered by Innovation

As we move beyond our 35th year in business, NightSearcher continues to lead the way in portable and rechargeable LED lighting. Since 1989, we've been committed to advancing lighting and power technologies designing high-performance solutions that professionals across the globe rely on every day. From rugged handheld torches to high-powered floodlights, our products are engineered to deliver durability, reliability, and precision in the most demanding environments.

Whether you're operating in industrial worksites, emergency response zones, or the rail and automotive sectors, NightSearcher provides dependable lighting built to meet real-world challenges.

Built on Experience. Driven by Innovation.

With over three decades of expertise, we've earned the confidence of leading organisations including Police, Fire & Rescue, Armed Forces, Utility providers, and more. Our long-standing heritage and commitment to product development ensure we stay ahead bringing smarter, more sustainable technologies to market that support evolving industry needs.

Lighting with Purpose

We recognise the growing demand for environmentally conscious alternatives. That's why our portfolio increasingly focuses on zero-emission, zero-noise solutions. Designed to support the global response to climate change without compromising on performance or reliability.

Thank You for Your Trust

To our loyal customers: thank you for your continued support. Your trust inspires us to keep innovating, evolving, and delivering lighting solutions that make your work safer, easier, and more efficient

Colin Howard Managing Director

We don't just promise performance, we guarantee it. Our warranty ensures long-term reliability.

NightSearcher's professional products are carefully designed and manufactured to the highest standards to ensure the reliability and durability our customers need. This is why we offer a 3 and 5-year standard warranty on all manufacturing defects and 1-year warranty on all rechargeable batteries from the date of purchase. The standard warranty can be extended to a 5 years Premium and 10 years Premium Plus warranty free of charge.

To find out more visit: <https://nightsearcher.co.uk/pages/warranty-information>

All information is correct at time of press, we reserve the right to alter product specifications at any time and for any reason without liability.

ILLUMINATE YOUR PITCHES AND COURTS, QUICKLY AND EFFECTIVELY WITH A SPORTSTAR LIGHTING KIT SYSTEM

Whether you're lighting up a full PITCH or sharpening shooting drills before Sundown, SportStar Delivers serious illumination — **WHEREVER YOU NEED IT.**

Thanks to precision engineered optics, this 20,000 lumen system delivers effective illumination equivalent to a 40,000 lumen floodlight. Achieving match level brightness across the pitch with half the energy. The advanced lens design focuses light where it's needed most, increasing lux levels on the playing surface while reducing glare, spill, and wasted output.

Perfect for Lighting:

- ✓ Football
- ✓ Rugby
- ✓ Netball
- ✓ Tennis
- ✓ Cricket
- ✓ Basketball courts
- ✓ Personal training and many more.....

MAGNUM FLASHLIGHTS – BUILT TO ENDURE, ENGINEERED TO PERFORM

The Magnum range is NightSearcher's most robust line of professional flashlights—designed for users who demand uncompromising performance, day after day. With precision-engineered aluminium housings, powerful beam output, and extended run times, these flashlights deliver reliability and strength in even the most challenging operational settings.

Ideal for security, inspection, maintenance, and outdoor use, Magnum flashlights combine durability with ergonomic design and advanced battery technology, ensuring dependable lighting when you need it most.

Magnum means business. When reliability is non-negotiable, this is the range that delivers.

LEP FLASHLIGHTS – FROM LASER TO LIGHT: HOW LEP WORKS

LEP stands for '**Laser Excited Phosphor**'. A cutting-edge lighting system that delivers an ultra focused, long range beam using laser precision. Unlike traditional LED flashlights that scatter light for general illumination, LEP flashlights concentrate light into a high intensity beam capable of reaching distances well beyond 1,000 metres. This makes them ideal for tactical, search and rescue, and long distance spotting applications.

How LEP Works

LEP technology converts a focused blue laser into broad-spectrum white light using a phosphor reaction. The result is a beam with minimal spill and maximum reach. At the core of every LEP flashlight is a precision optical system:

- A blue laser diode generates the initial beam
- A collimating lens aligns the laser into a narrow stream
- The beam strikes a phosphor layer, converting it into visible light
- The output is shaped and projected through a glass lens, forming a concentrated beam with extreme throw

This process produces a beam profile that LED systems simply can't match intense, accurate, and built for distance.

Why Choose LEP?

1. **Extreme Throw Distance** – Spot targets over 1km away with precision
2. **Minimal Spill** – Focused beam with no wasted light
3. **Energy Efficient** – High brightness with lower power draw
4. **Durable Design** – Built for harsh environments and professional use
5. **Optical Precision** – Engineered for accuracy in every beam

HT & ZOOM HEAD TORCHES – PRECISION LIGHTING, CUSTOMISABLE BEAM

The **HT and Zoom** ranges of NightSearcher head torches are engineered for professionals who need dependable, high-performance lighting in challenging conditions. Combining robust construction with powerful LED output, these torches deliver exceptional brightness, long runtimes, and ergonomic comfort for extended wear.

The HT range offers versatile, wide-beam illumination ideal for close-up tasks and general use, while the Zoom range features adjustable beam focus—allowing users to switch seamlessly between flood and spot lighting for precision at any distance.

With intuitive controls, rechargeable options, and models featuring motion sensor activation, both ranges are designed to keep hands free and productivity high—whether you're on-site, in the field, or working in low-light environments
